

ROCKLAND

▶ POUND SAVER™

More Freight. Less Weight.

The Pound Saver™ is the latest development in high-performance trailer flooring from Rockland. If you want to see your trailers lose weight, Rockland has the recipe.

Benefits of the Pound Saver™

Stronger – The Pound Saver™ is 33% stronger than standard oak flooring thanks to reinforcing fibers that are incorporated into the floor design.

More Durable – Pound Saver™ floors increase working life by reducing floor fatigue that can occur after years of service.

Maintenance Friendly – Pound Saver's™ proprietary membrane shields the underside of the floor from water, salt and gravel that can lead to costly floor repairs.

Lighter than Standard Oak – The Pound Saver™ is up to 332 pounds lighter than a standard 1-5/16" laminated oak floor.

Built For Your Bottom Line – The Pound Saver™ will increase fuel economy and payload while reducing floor maintenance.

U.S. Patent 7,765,758

APPLICATIONS

- Van Trailers
- Containers
- Truck Bodies
